

ROGUE®

CTM-1 FUNCTIONAL CABLE TOWER

⚠ IMPORTANT SAFETY INFORMATION

DISCLAIMER:

Resistance training, gymnastics training, and activities at height are potentially dangerous and may lead to severe injury or even death. Use common sense when training, obtain instruction in the proper execution of movements, and understand your limitations. This equipment must only be used by competent and responsible persons. Obtaining instruction in appropriate techniques and methods of use is your own responsibility. You assume all risks and responsibilities for all damage, injury or death which may occur during or following incorrect use of this equipment in any matter whatsoever. Rogue Fitness bears no liability beyond the replacement value of the equipment in question.

WARNING:

THIS RACK MUST BE BOLTED TO THE FLOOR BEFORE USE. MINIMUM TWO PEOPLE REQUIRED FOR SAFE ASSEMBLY. MISUSE OF THIS RACK CAN RESULT IN SEVERE INJURY.

Both Rogue Fitness and buyer disclaim any express or implied warranty, including, without limitation, warranties or merchantability and/or fitness for a particular purpose with respect to the equipment. Buyer assumes all liability to use of equipment.

TABLE OF CONTENTS

CTM-1 FUNCTIONAL CABLE TOWER

Included Tools.....	3
Included Parts.....	4
Assembly.....	10

INCLUDED TOOLS

Note: Images not shown at scale

1

Qty: 2x

1-1/2” Wrench

2

Qty: 2x

15/16” Wrench

3

Qty: 1x

Multi Tool (3/4”, 9/16”, 5/8” and 7/16” Wrench)

4

Qty: 1x

3/32” Allen Key

5

Qty: 1x

1/8” Allen Key

6

Qty: 1x

5/32” Allen Key

7

Qty: 1x

7/32” Allen Key

8

Qty: 1x

5/16” Allen Key

9

Qty: 1x

3/8” Allen Key

INCLUDED PARTS

Note: Images not shown at scale.

1

Qty: 1x

CTM Front Upright

2

Qty: 1x

*

CTM Rear Upright

3

Qty: 1x

CTM Bottom Crossmember

4

Qty: 1x

Peanut Pulley

5

Qty: 2x

**

Top Band Peg

6

Qty: 2x

**

Bottom Band Peg

7

Qty: 1x

Top Guide Rod Retaining Bracket

8

Qty: 1x

Swivel Trolley

9

Qty: 1x

CTM Top Crossmember

10

Qty: 1x

*

CTM Base Foot - LEFT

11

Qty: 1x

*

CTM Base Foot - RIGHT

12

Qty: 1x

*

CTM Base Center

* Only included with Stand Alone CTM-1.
** Band Peg Kit only included if purchased at checkout.

INCLUDED PARTS

Note: Images not shown at scale.

13

Qty: 2x

*

CTM Stabilizer Tube

14

Qty: 1x

*

Front Base Bracket - LEFT

15

Qty: 1x

*

Front Base Bracket - RIGHT

16

Qty: 1x

*

Back Base Bracket - LEFT

17

Qty: 1x

*

Back Base Bracket - RIGHT

18

Qty: 1x

*

Triangle Plate

19

Qty: 2x

Shroud Bracket

20

Qty: 2x

Rear Shroud

21

Qty: 1x

Right Shroud

22

Qty: 1x

Left Shroud

23

Qty: 2x

Guide Rod

24

Qty: 2x

Weight Stack Bottom Bumper

* Only included with Stand Alone CTM-1.

INCLUDED PARTS

Note: Images not shown at scale.

25

Qty: 1x

Weight Stack Stem

26

Qty: 23x(250lb) or 28x(300lb)

*

10LB Weight Stack Plate

27

Qty: 1x

Weight Stack Selector Pin w/ Lanyard

28

Qty: 1x

CTM Low Row

29

Qty: 1x

Lat Pulldown Cable (Yellow Tag)

30

Qty: 1x

Trolley/Trolley Cable (Blue Tag)

31

Qty: 1x

**

Lat Bar

32

Qty: 1x

**

Standard Grip Triangle

33

Qty: 1x

**

Single Handle Cable Attachment

34

Qty: 1x

Lat Bar Hanger - LEFT

35

Qty: 1x

Lat Bar Hanger - RIGHT

36

Qty: 2x

1" x 4.75" Hex Bolt

* Weight selection made at checkout.
** Item may look different. Selection made at checkout.

INCLUDED PARTS

Note: Images not shown at scale.

37 Qty: **8x**

1” x 5” Hex Bolt

38 Qty: **8x**

1” Flat Washer

39 Qty: **10x**

1” Lock Washer

40 Qty: **10x**

1” Hex Nut

41 Qty: **12x**

5/8” x 4.25” Hex Bolt

42 Qty: **2x**

5/8” x 4.5” Hex Bolt

43 Qty: **2x**

5/8” Flat Washer

44 Qty: **15x**

5/8” Lock Washer

45 Qty: **15x**

5/8” Hex Nut

46 Qty: **4x**

1/4” x 2” Button Head Screw

47 Qty: **8x**

1/4” Nylock Nut

48 Qty: **6x**

1/4” x 5/8” Button Head Screw

INCLUDED PARTS

Note: Images not shown at scale.

Qty: 4x

1/4” x 3/8” Button Head Screw

* Complimentary Monster Half Strip included with Swivel Trolley. See page 36 for Monster Strip assembly.

1” HARDWARE LENGTH GUIDE

Note:

- 1” x 5” and 1” x 4-3/4” Bolts shown to scale below to help differentiate variations in length.

STEP 1 (STAND ALONE ONLY)

- If Rack Attach version was purchased skip to Page 12.
- **NOTE: DO NOT FULLY TIGHTEN HARDWARE UNTIL STEP 5-B.**
- Attach Front Base Bracket - LEFT [14] and Back Base Bracket - LEFT [16] to CTM Base Foot - LEFT [10] using 5/8" x 4.25" Hex Bolts [41], 5/8" Lock Washers [44], and 5/8" Hex Nuts [45].

- Attach Front Base Bracket - RIGHT [15] and Back Base Bracket - RIGHT [17] to CTM Base Foot - RIGHT [11] using 5/8" x 4.25" Hex Bolts [41], 5/8" Lock Washers [44], and 5/8" Hex Nuts [45].
- Secure the CTM Base Center [12] between the two CTM Base Feet [10,11], aligning it with the brackets. Use 5/8" x 4.25" Hex Bolts [41], 5/8" Lock Washers [44], and 5/8" Hex Nuts [45] to fasten the assembly.

STEP 2 (STAND ALONE ONLY)

- Secure CTM Stabilizer Tubes [13] to Base Brackets using 5/8" x 4.25" Hex Bolts [41], 5/8" Lock Washers [44], and 5/8" Hex Nuts [45].
- Secure CTM Rear Upright [2] to CTM Stabilizer Tubes [13] using 1" x 5" Hex Bolts [37], 1" Lock Washer [39], and 1" Hex Nut [40].

STEP 3

- Attach CTM Bottom Crossmember [3] to CTM Rear Upright [2] using Triangle Plate [18], 5/8" x 4.25" Hex Bolts [41], 5/8" Flat Washer [43], 5/8" Lock Washers [44], and 5/8" Hex Nuts [45]. On center holes use 1" x 5" Hex Bolts [37], 1" Lock Washer [39], and 1" Hex Nut [40].

FOR RACK ATTACH: DO NOT FULLY TIGHTEN.

- **Note: Only single existing Upright shown.**
- Attach CTM Bottom Crossmember [3] to Rack Upright using 1" x 5" Hex Bolts [37], 1" Flat Washer [38], 1" Lock Washer [39], and 1" Hex Nut [40].

FOR BOTH VERSIONS:

- For ease of assembly remove Footplate from CTM Low Row [28].
- Secure CTM Front Upright [1] between CTM Bottom Crossmember [3] and CTM Low Row [28] using 5/8" x 4.5" Hex Bolts [42], 5/8" Lock Washers [44], and 5/8" Hex Nuts [45].

STEP 4

- Stand Alone version shown through remainder of instructions, same assembly applies for Rack Attach.
- Secure the Pulley Swivel to the Trolley using the preinstalled hardware included with the Pulley Swivel.
- Tighten until there is light friction in the joint, while still allowing the Pulley Swivel to hinge freely.
- While pulling the handle triggers, slide Swivel Trolley [8] and onto CTM Front Uprights [1].
- Slide about halfway down Upright and release triggers to lock pop pins in place when the viewing window is showing number 25.

STEP 5

- Attach CTM Top Crossmember [9] to uprights using 1" x 5" Hex Bolts [37], 1" Flat Washer [38], 1" Lock Washer [39], and 1" Hex Nut [40].
- **!** Ensure the endplate of the CTM Top Crossmember is flush with top of the CTM Rear Upright.
- **!** Hole cutout locations on the CTM Top Crossmember may vary depending on Rack Attached versus Stand Alone.
- **Tighten all hardware on tower in order from 1 to 4 shown in 5-B.**

STEP 6

Tools Required:

- 7/32” Allen Key, 9/16” Wrench
- The Swivel Trolley need to be calibrated for your specific rack.
- Keeping the Swivel Trolley locked in place, tighten the Button Head Screws shown in **6-A** using 7/32” Allen Key until looseness or “wobble” is gone.

- Unlock pop pins and roll Trolley up and down Upright several inches to feel tightness. If wobble persists, tighten the Screws in **6-A** again. If any friction is felt, Trolley is too tight and Screws should be loosened a quarter turn.
- Once calibrated, tighten both rollers on rear of Trolley using Allen Key and Wrench.

STEP 7 (OPTIONAL BAND PEG KIT)

- If Band Pegs were not purchased, skip to **STEP 8**.
- To install Top Band Pegs [5], remove hardware from Weight Stack Stem [25] shown in **7-A**.
- Install Top Band Pegs [5] using hardware removed in step **7-A**.
- Attach Bottom Band Peg [6] to CTM Bottom Crossmember [3] using 5/8" x 4.5" Hex Bolt [42], 5/8" Lock Washer [44], and 5/8" Hex Nut [45].

STEP 8

- Place Weight Stack Bumpers [24] over outer 1” holes on the CTM Bottom Crossmember as shown in **DETAIL** and insert Guide Rods [23] until they rest on top of the CTM Bottom Crossmember.

Note:

- Allow guide rods to angle outward while completing weight stack assembly on the following steps.

STEP 9

Note:

- This step is best accomplished with two or three people.
- One at a time, carefully stack all included 10LB Weight Stack Plates [26] down the Guide Rods [23], ensuring not to drop them.

- Once weights are stacked on each side, slide the Weight Stack Stem [25] down the Guide Rods until resting on top of weight stack.
-  Ensure Arrows and “20 LB” Sticker are facing the right side of tower.

STEP 10

- Remove Top Guide Rod Retaining Bracket [7] from CTM Top Crossmember [9].
- Slide Top Guide Rod Retaining Bracket [7] on top of Guide Rods [23].
- Position Guide Rods vertically. Slide in the Top Guide Rod Retaining Bracket [7] above the Guide Rods [23]. Attach to CTM Top Crossmembers [9] using hardware removed in **STEP 10-A**.

STEP 11

- Unwind Trolley Cable (Blue Tag) [30] to remove twists/kinks.
- Remove Plastic Cable Retainer from CTM Bottom Crossmember shown in **11-A**.
- Starting on the left side of the tower, feed cable through the CTM Bottom Crossmember pulleys shown in **11-B** and then immediately up towards the CTM Top Crossmember
- Feed cable to the CTM Top Crossmember feeding around the outside middle pulley shown in **11-D** and then immediately towards the ground.
- While holding Peanut Pulley [4] in the air, route the cable around the pulley shown in **11-E**, making sure the arrows align as shown in the image.

STEP 12

- Continue feeding up and around the outside front pulley on left side of CTM Top Crossmember and continue to outside rear pulley.
- Feed cable around outside rear pulley and continue towards the Weight Stack Stem.

STEP 13

- Feed the Trolley Cable [30] around the pulley on the Weight Stack Stem and back towards the top of the tower.
- On the right side of the tower, feed cable around outside rear pulley and feed around outside front pulley.
- Continue feeding the cable down and around the Peanut Pulley [4], then route it back up toward the CTM Top Crossmember.

STEP 14

- Feed cable around center angled pulley and immediately down and around center lower pulley.
- Continue to feed cable up and around center rear pulley and continue towards front of tower.

14-A

STEP 15

- Feed cable around and down center front pulley.
- Feed cable down and out through Swivel Trolley [8].

STEP 16

Tools Required:

- 3/32” Allen Key & 5/8” Wrench
- Completely disassemble the loose Clevis included with cable by unscrewing set screws and Split Threaded Insert, and remove blue tag on end of cable.
- Slide parts over the ball on cable as shown on **16-B**.

- Insert Grommet into non-threaded side of Split Threaded Insert and screw Clevis End on threaded side using 5/8” Wrench.
- Slide Plastic Stop forward and align outer holes with threaded holes on Clevis End and re-insert Set Screws. Fully tighten Set Screws.

STEP 17

- Unwind Lat Cable (Yellow Tag) [29] to remove twists/kinks.
- Feed cable up to the center front pulley on CTM Top Crossmember.
- Continue to the rear of the tower and feed cable down through the center rear pulley.

- Feed Lat Cable end down and around rear pulley in the CTM Bottom Crossmember as shown in **17-C**.
- Feed cable around front pulley and up towards Peanut Pulley [4].

STEP 18

- Feed cable up and around Peanut Pulley.
- Feed cable around the front pulley on the CTM Bottom Crossmember as shown in **18-B**.
-  Ensure cable runs below tab as shown in **18-B**.

Note:

- The cable will be routed through the hole at the bottom of the CTM Front Upright and Low Row.
- Feed the cable through the pulleys in the Low Row, directing it out toward the front of the tower.

- Follow **STEP 16** again and assemble clevis to ball end of cable as shown in **18-D**.

STEP 19

- Pull bolt end of Blue Trolley Cable [30] up to Trolley [8].
- Screw bolt ends of Trolley Cable [30] into bottom of stop block on back of Swivel Trolley [8].
- Loosen the hex nut if needed to ensure approximately 1/2” of threads are showing between the bolt head and nut.

- Starting with no weight selected on the Weight Stack, check cables by pulling on each clevis.
- If cables are too tight or loose, adjust accordingly by loosening or tightening the lower 1/2” Jam Nuts on back side of the Trolley [8].
- Reinstall Plastic Cable Retainer to CTM Bottom Crossmember shown in 19-D.

STEP 20

- Apply the Weight Stack Number Labels [49] on the front of the Weight Stack Plates, approximately 3.5” from the edge of plate.
- Attach key ring on Selector Pin Lanyard [27] to front hole on pulley plate of the Weight Stack Stem [25].

STEP 21 (SHROUD ASSEMBLY)

- Attach Rear Shroud [20] on rear uprights by placing 1” Lock Washers [39] and 1” Hex Nuts [40] through window cutouts on shrouds and secure using 1” Flat Washers [38] and 1” x 4-3/4” Hex Bolts [36].

21-A

STEP 22

- Install the Shroud Bracket [19] to the lowest pulley plates on the CTM Top Crossmember using 1/4" x 2" Button Head Screw [46] and 1/4" Nylock Nut [47]
 -  Ensure threaded inserts are positioned toward the rear upright.
 - **Arrow indicates front of the unit.**
- Install the Shroud Bracket [19] to the pulley plates on the CTM Bottom Crossmember using 1/4" x 2" Button Head Screw [46] and 1/4" Nylock Nut [47]
 -  Ensure threaded inserts are positioned toward the rear upright.
 - **Arrow indicates front of the unit.**

STEP 23

- Attach Backing Plate [51] to Right and Left Shroud [21,22] using 1/4" x 3/8" Button Head Screws [52] and 1/4" Nylock Nuts [47].
- Attach Right and Left Shroud [21,22] to Shroud Brackets [19] using 1/4" x 5/8" Button Head Screw [48].

- Ensure Right Shroud [21] overlaps Left Shroud [22] on the front.
- Secure Right and Left Shroud [21,22] to each other in front using 1/4" x 5/8" Button Head Screw [48].

STEP 24

- Remove hardware from CTM Top Crossmember as shown in **24-A**.
- Attach Lat Bar Hanger - LEFT and RIGHT [34,35] using the hardware removed in **24-A**.

STEP 25

- Install Foot Plate that was removed in **STEP 3-B** into CTM Low Row [28].
- Attach Lat Bar [31] to Lat Pulldown clevis.
- Attach Single Handle Cable Attachment [33] to Trolley clevis.
- Attach Standard Grip Triangle [32] to CTM Low Row Clevis.
- **Note: Attachment depends on selection made at checkout.**

CABLE MAINTENANCE

Over time, the cables within the system may experience some normal inelastic stretching. Follow the below instructions to re-tighten the cables.

STEP 1

Tools Required:

- Multi Tool
- Tighten both Trolley Cable bolt heads up towards the stop blocks on Swivel Trolleys.

- If cable system is tight, no further calibration is needed.

STEP 2

Tools Required:

- Multi Tool, 7/32” Allen Key
- Remove the Shroud. Remove Cable Retainers and hardware from Side Peanut Pulley (27-A) and move pulley up by one hole (27-B).
- Re-adjust the height of the Trolley Cable Bolts to calibrate the cable tightness.
- If slack persists, perform the same pulley relocation on the Left Side Peanut Pulley. Recalibrate the Trolley cable bolts and check cable tightness.

- If slack is still present, continue repeating process, alternating between the Left and Right Side Peanut Pulleys, raising the pulley by one hole until the whole cable system is taut but not suspending the plate load carriage above its stop blocks.

Note:

- If installing pulley on the uppermost hole of the Side Peanut Pulleys, the lower Cable Retainers are not needed.

INCLUDED MONSTER STRIP

- *Hardware and tools not included for installing Monster Strips [50].
- 3/8” x 2-1/2” Wood Lag Screws and 3/8” Flat Washers (not included) are recommended if mounting Strip to wall or wood stud.
- 15/64” Diameter drill bit recommended if using 3/8” Lag Screws.
- Identify stud in wall and mark desired height of top hole. Drill pilot hole in marked location.
- Put thread-side of screw through washer then screw through top hole at the back of the Strip into wall until wood but do not fully tighten.
- Let strip hang and ensure it is square using a level then mark locations of the remaining holes.
- Hold strip to the side as shown in **28-B** and drill pilot holes in the marked locations.
- Put thread side of screw through the washer then screw through bottom 3/8” hole in back of Strip into the wall loosely.
- Screw in the remaining two Lag Screws and fully tighten all screws.
- If attempting to secure Strip to concrete or other material, the buyer is responsible for using correct hardware.
- It is the buyer’s responsibility to install strip in a location and with hardware capable of supporting the aggregate weight of strip, all gear mounted or stored, and any person using it.
- If you are not confident in your mechanical skills, please seek the help of a professional to perform the installation.
